

PLATFORM SUMMARY

Juralex Audit is an EU-hosted compliance scanning platform that helps law firms, data protection officers, and regulatory bodies verify website compliance with the EU AI Act, GDPR, ePrivacy Directive, and country-specific statutory requirements. Each scan combines pattern analysis, live government registry queries, and EU-hosted AI evaluation to produce auditable, citable findings.

THREE VERIFICATION METHODS

Pattern Analysis

Structural and textual checks: cookie banners, consent forms, impressum fields, required legal mentions.

Government API Verification

Live lookups against KRS, NIP, REGON (PL), BRAO (DE), CNB (FR), ICAB (ES). Direct registry queries — not cached.

AI-Powered Evaluation

EU-hosted Mistral AI evaluates GDPR text, EU AI Act risk indicators, pharma compliance. Criteria defined by human legal review.
